

NORTHLAND RECREATION SUPPLY

ALL THINGS PLAYGROUND

Parts, Repairs, Inspections...we cover it all!

REPAIRS & PARTS

We manufacture and install replacement parts for all brands of playground equipment, even if the original piece of equipment was purchased from another manufacturer. We can readily supply swing set & slide accessories, along with other freestanding playground equipment parts. If you require custom made components, or replacement parts for old Romperland structures, our in-house manufacturing shop is fully equipped to repair or build most anything that you require.

INSPECTIONS & RELOCATING

When it comes to relocating a CSA compliant playground, do not leave this work to just any contractor. Northland's CSA Certified Playground Inspector & Installer is an expert in this field with over 20 years experience; our team can ensure your equipment is properly removed and reinstalled, taking care not to damage your equipment and guarantee it is compliant when reinstalled. Improperly installed playgrounds present severe risks to students, the community and facilities that maintain them.
